DETAILED ACTION

This action is in response to the application filed on 20 February 2004 in which claims 1-9 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation " the adjusting post of the main body of the microphone " in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Keliiliki (U.S. Patent No. 6,427,018).

Regarding claims 1-3, Keliiliki teaches an adjustable ear-hook earphone with a microphone comprising a C-shaped hook (at 10) with a sleeve (13) on top end thereof; a wire entry (55, 57), a wire exit (24, 55), and a wire channel (as shown in the figures through item 10) arranged on upper part of the C-shaped hook in tangential direction; a main body (11) of earphone with a speaker mounted on lateral side and a limiting part (17) extending from top side thereof, an adjusting post (15) clipped on lateral side of the limiting part; wherein the outer diameter of the adjusting post is corresponding to the inner diameter of the sleeve so that the adjusting post is sleeved into the sleeve to allow the main body of earphone turning left or right in a certain angle (which reads on its ability to be used on either ear) as well as moving upwards or downwards (arrow 16); a flexible tube (35) with one end pivoted to the lateral side of the main body of earphone and extending downwards; the flexible tube swings to and fro; a microphone (45) disposed on one end of the flexible tube and connected with the main body of earphone by the flexible tube, and a signal wire (22, 46) passing through the entry, the wire channel, the wire exit, and then being connected to the main body of earphone.

Regarding claim 4, Keliiliki teaches the adjustable ear-hook earphone with a microphone as claimed in claim 1, wherein the limiting part (17) of the main body of earphone further having a wire (as shown in the figures) accommodating slot for housing the signal wire therein.

Regarding claims 5-8, see the rejection of claims 1-4 respectfully.

Regarding claim 9, Keliiliki teaches the adjustable ear-hook earphone with a microphone

Art Unit: 2646

as claimed in claim 5, wherein the adjustable ear-hook earphone with a microphone further having a flexible tube (35) with one end pivoted to the lateral side of the main body of earphone (as shown in figure 7) and extending downwards; the flexible tube swings to and fro, a microphone disposed on one end of the flexible tube and connected with the main body of earphone by the flexible tube.
